

## Position Announcement

### Field Services Clinician in Food Animal Production and Population Medicine

Department of Veterinary Large Animal Clinical Sciences  
College of Veterinary Medicine & Biomedical Sciences  
Texas A&M University

The Department of Large Animal Clinical Sciences, College of Veterinary Medicine and Biomedical Sciences, Texas A&M University invites applications for a full-time, 11-month, clinical track faculty position in Food Animal Medicine and Surgery at the academic rank of Clinical Assistant Professor, Clinical Associate Professor, or Clinical Professor based on experience. Candidates must have a DVM/VMD or equivalent degree. Applicants must be board certified or eligible to take the certifying examination of the ACVPM, ACT, ACVIM, ABVP, or other relevant specialty. If the candidate has not completed board certification at the time of hire, this must be accomplished within 2 years of the hiring date. Applicants must meet requirements for regular licensure in the State of Texas.

This position contributes to a team of boarded internal medicine, surgery, and theriogenology faculty serving the clinical, teaching, and research missions of the Food Animal Medicine and Surgery Service within the Texas A&M University Veterinary Medical Teaching Hospital. This position is clinical track in accordance with the needs of the department; thus, the successful candidate will be expected to be effective in institutional citizenship, teaching and scholarly activity, with the greatest time commitment and greatest expectation for excellence in clinical service and teaching.

**I. Institutional Citizenship:**

The successful candidate will participate actively in Departmental, College, University and specialty organization committee service and other leadership activities, and will demonstrate collegiality in all aspects of the position.

**II. Teaching:**

The successful candidate will participate with other large animal clinicians in teaching and mentorship of veterinary students, interns, and residents through the food animal medicine and surgery service as well as through didactic lectures and laboratories in the veterinary professional curriculum. The successful candidate will develop well-organized creative lectures and laboratory materials for courses in the professional curriculum. The successful candidate will provide leadership that will enhance the quality and scope of the Veterinary Medical Teaching Hospital's Field Services section patient care program and provide guidance and mentorship in the large animal house officer training program. Participation in continuing education presentations for practitioners in the state of Texas and participation in other state, national, and specialty meetings is expected. Support to food animal producer groups in the state of Texas is expected. Excellence in teaching is expected of all faculty members in this department.

**III. Scholarship of Discovery, Integration, Application, and Teaching:**

Clinical track faculty are expected to develop collaborative research and support the research needs of colleagues as appropriate. Faculty are expected to publish results of original work in high quality refereed journals, and present research to peer groups. The emphasis for clinical track faculty is engagement in scholarship of integration and teaching. Examples of these activities include writing book chapters, presenting continuing education seminars / laboratories, and developing /studying educational methodologies.

**IV. Patient Care:**

The successful candidate joins a team of 3 boarded internists, 2 boarded surgeons, and a boarded theriogenologist to provide routine and emergency care for cattle, sheep, goats, New and Old World camelids, swine, potbelly pigs, and exotic hoofstock in the hospital and field service units. Food Animal Field Services has two new trucks fully equipped with refrigerators, inverters, biosecurity kits and all other tools necessary to practice state-of-the-art ambulatory food animal medicine. Clinical assignments including after-hours emergency duty will be based on clinical needs and will be shared by the faculty team. The typical effort appointment of patient care and clinical teaching for a clinical track food animal clinician is 70%. The successful candidate will have the opportunity to provide leadership for the development and introduction of new techniques and concepts that will enhance the quality and scope of the Veterinary Medical Teaching Hospital's patient care programs.
